

Basic Programming Skills Assessment

This task is about creating a MCQ Test Builder. You will create a small utility that will ask simple questions from the user and assist them in creating an MCQ Test paper. At the end of the process a test paper is produced. The questions will prompt user to enter the title of the test, questions in the test and their individual answers. The sequence of questions should be as follows:

Enter the title of the Test:

...

Enter Question text for Question 1:

...

Enter the text for Option A:

...

Enter the text for Option B:

...

Enter the text for Option C:

...

Enter the text for Option D:

...

Would you like to continue adding question or quit. Answer with 'Y' or 'N'

(If the user responds with 'Y', you will repeat this sequence. You will exit the sequence till the user enters 'N' at the end of Option D. If the user selects 'N', the system should inform the user with this text:

You have completed all the questions in the test, would you like to see the test paper now? Reply with 'Y' or 'N'

If this user responds with 'Y', you will proceed to print the Test Paper in the format given in the next page:

(Time Limit: up to 1 hour)
